Virtual & In-Person Classes @eta University

eta University

What is the correlation of 3D Printing and costume design? What does hip hop have to do with health and wellness? You can find these answers at eta Creative Arts' educational wing: eta University where you began shaping your future as an entrepreneur, a Drone pilot, an award winning Costume Designer, etc. In our interdisciplinary program approach, we understand the impact of performance media on our youth and community. We therefore strive to offer them learning that will "take place in the air and on the ground," providing them a variety of different approaches to learning. eta University prepares our 21st century students for their 21st century lives.
